The screenshot displays the IEEE Standards Association website. At the top, there is a navigation bar with links for IEEE.org, IEEE Xplore Digital Library, IEEE Standards, IEEE Spectrum, and More Sites. A search bar is located on the right. Below the navigation bar, the main header reads "IEEE STANDARDS ASSOCIATION" with a search icon. A secondary navigation bar includes "Standards", "Products & Services", "Technologies & Initiatives", and "Participate". On the right side of this bar, there are buttons for "MAC ADDRESS" and "BUY STANDARDS".

The main content area features a blue banner with the text "IEEE-SA - Registration Authority" and the subtitle "Your trusted source for acquiring MAC Addresses and Unique Identifiers". On the left side of this banner, there are social media icons for Twitter, LinkedIn, Facebook, Email, and a share icon.

Below the banner, there is a section titled "< Products & Services" with a list of links: "Registration Authority", "General Information", "Infographic", "Apply for an Assignment", "Information Change Form", "Credit Application Form", and "Tutorials".

The central focus is a video player titled "How to obtain MAC addresses (English)". The video player shows a thumbnail with the text "How to obtain MAC addresses" and a play button. At the bottom of the video player, there is a language selection menu: "View in: Chinese | English | Japanese | Korean | Russian". The "Japanese" option is highlighted with a red box.

The screenshot shows the IEEE-SA website interface. At the top, there are navigation links for 'IEEE Standards', 'IEEE Spectrum', and 'More Sites'. Below this is the 'ASSOCIATION' header with a search bar. The main content area is titled 'IEEE-SA - Registration Authority' and includes a sub-header 'Your trusted source for...'. A left sidebar contains a list of navigation items: 'Registration Authority', 'General Information', 'Infographic', 'Apply for an Assignment', 'Information Change Form', 'Credit Application Form', 'Tutorials', 'Contact Us', 'MA-L', 'MA-M', 'MA-S', 'CID', and 'Ethertype'. The 'MA-L' item is circled in red. A dropdown menu is open, showing 'Products & Services' with items: 'Registration Authority', 'Infographic', 'Apply for an Assignment', 'Information Change Form', 'Credit Application Form', 'Tutorials', 'Contact Us', 'MA-L', 'MA-M', 'MA-S', 'CID', 'Ethertype', 'Manufacturer ID', 'LLC', and 'URN'. The 'MA-L' item in the dropdown is highlighted in grey. A red arrow points from the circled 'MA-L' in the sidebar to the highlighted 'MA-L' in the dropdown. To the right of the dropdown, there are language options: 'Chinese (PDF) | Japanese (PDF) | Korean (PDF) | Russian (PDF)'. Below these is the section 'MAC Address Block Large (MA-L)' with a red underline. The text describes the product as a previously referred to as an OUI (Organizationally Unique Identifier) and is still referred to as such in many standards. It is an IEEE Registration Authority (RA) specific term that is referred to in various standards and may be used to identify companies on the IEEE Public Listing. A MA-L assignment includes an OUI and the right to generate various extended identifiers based on that OUI. It is most often used to create IEEE 802-defined MAC addresses (EUI-48 and EUI-64). The OUI included in the MA-L assignment may be appended with 24 organization-supplied bits to form a EUI-48 or 40 organization-supplied bits to form a EUI-64. The included OUI may also be used to generate EUI-60 (deprecated), CDI-32, TCDI-40, MAC-48 (obsolete term), create multicast addresses (per IEEE Std 802), and as a unique root for various context dependent identifiers. It may also be used as a company identifier in those protocols and protocol standards that specify the use of a 3 octet field as a part of the protocol identification mechanism. For more information, please see the tutorial "Guidelines for Use of Extended Unique Identifier (EUI), Organizationally Unique Identifier (OUI), and Company ID (CID)". Below this text is the 'Registration Fees' section, which includes a table with columns 'Products' and 'Fees'.

Products	Fees
One Time Fees	
Publicly Registered MA-L (Company name & address will be displayed on the IEEE public listing)	US \$2,995
Contract Fee (Optional - for those that need a signed, stamped hard copy of a contract to release payment)	US \$200
Optional Recurring Fees	
Yearly Confidentiality Renewal Fee*	US \$3,460

Registration Authority

Registration Authority for ISO 8802
The Institute of Electrical and Electronics Engineers, Inc., has been designated by the ISO Council to act as the Registration Authority for the implementation of International Standards ISO 8802.

IEEE offers Registration Authority programs or registries which maintain lists of unique identifiers under standards and issue unique identifiers to those wishing to register them. The IEEE Registration Authority assigns unambiguous names to objects in a way which makes the assignment available to interested parties. The IEEE Registration Authority operates under the direction of the IEEE-SA Board of Governors.

- **Registration Authority Committee (RAC):** Oversight committee that assists standard developing organizations to establish unambiguous, sustainable registration authorities.
- **Tutorials:** Informative documents to assist with learning more about IEEE Standard Association Registries.
- **FAQs:** The commonly most asked questions about our registries and how they are used.
- **Contact Us:** Contact Registration Authority staff via email, snail mail, phone or fax.

Re: IEEE Assignment of a MA-L (IEEE MAC Address Large) Assignment

Fee	\$2,995.00(US dollars)
** Wire Transfer Bank's fee	20.00
	<hr/>
	\$3,015.00

If Paying via Wire Transfer:
Wells Fargo
123 South Broad Street
Philadelphia, PA 19109 USA
ABA or R/T Number: 121000248
Account Number: 2011306738416
Account Name: IEEE
S.W.I.F.T. Address: WFBIUS6S

**If Paying via Check Please
mail payment to:**
IEEE Registration Authority
IEEE Standards Department
445 Hoes Lane
Piscataway NJ 08854

Angela N. Thomas

Registration Authority

IEEE offers Registration Authority programs or registries which maintain identifiers under standards and issue unique identifiers to those wishing to use IEEE Registration Authority assigns unambiguous names to objects in a way that is assignment available to interested parties. The IEEE Registration Authority operates in the direction of the IEEE-SA Board of Governors.

- **Registration Authority Committee (RAC):** Oversight committee that develops and maintains the IEEE Registration Authority programs and registries.
- **Tutorials:** Informative documents to assist with learning more about IEEE Association Registries.
- **FAQs:** The commonly most asked questions about our registries and registries.
- **Contact Us:** Contact Registration Authority staff via email, snail mail, phone, or video conference.

MAC アドレス のお届け(メールによるお知らせ)

Month-Day, Year

Registration Authority for ISO 8802
The Institute of Electrical and Electronics Engineers, Inc., has been designated by the ISO Council to act as the Registration Authority for the implementation of International Standards ISO 8802.

Attn: Meiko Kajikawa
IEEE Japan Office
1-1-1 Minami-aoyama
Minato-ku, Tokyo 107-0023
JP

Please take a moment to verify that the information contained in the company addressed area (above) is correct. If it is not entirely correct, please notify the IEEE Registration Authority (IEEE RA) immediately.

Following is the MAC Address Block Medium (MA-M) assignment that you have requested from the IEEE. Your MA-M assignment includes blocks of 48-bit Extended Unique Identifier (EUI-48) and 64-bit Extended Unique Identifier (EUI-64). EUI-48 and EUI-64 identifiers may be used as IEEE 802-defined MAC addresses of EUI length respectively.

The base value of your MA-M assignment may also be used to generate unique multicast addresses (per IEEE Std 802). This 28-bit identifier is unique to the assignee, but there is no definition of an OUI-28 identifier. The assignee of the MA-M cannot make any assumptions about the first 24 bits of the assigned 28 bits, and may not use those 24 bits as an OUI because that OUI is assigned to the IEEE Registration Authority for use in MA-M Assignments.

The user tutorials on our web site describe how the MA-S assignment can be used in conjunction with a number of standards and specifications. This assignment applies to all of these. The tutorials can be found on the web at: <http://standards.ieee.org/develop/regauth/tut/index.html> (<http://standards.ieee.org/develop/regauth/tut/index.html>)

Your MA-M assignment is:

28-bit Base Value
AA-BB-CC-0

EUI-48 Address Block
0-00-00 through F-FF-FF

Issue date is:

Month-Day, Year

Invoice Number:

RA0000000000

It should be stressed that the IEEE Registration Authority has made every effort to ensure that the same numbers are not assigned to any other entity but does not guarantee that duplicate assignments have

IEEE米国本部で申請者様からのご入金を確認されると、7営業日以内にMACアドレスが発行されます。(これを MAC Address Assignment と言います)

メールでお知らせが届きましたら、メールに記載の手順に従い、IEEE アカウントにサインインしてください。

Assignmentsフォルダーで左記のようなMAC Address Assignment 書類をダウンロードできます。(次ページ参照)
